

03/22 Time:	Existing Model	Proposed Model
8:00 AM	 An aerial perspective of a residential lot with three houses. The shadows are long and cast towards the northwest, indicating a low sun position. The houses are arranged with a larger one on the left and two smaller ones on the right.	 An aerial perspective of the same lot with the proposed model. The shadows are long and cast towards the northwest, similar to the existing model.
10:00 am	 An aerial perspective of the existing model at 10:00 am. The shadows are shorter and cast more directly towards the north.	 An aerial perspective of the proposed model at 10:00 am. The shadows are shorter and cast more directly towards the north.
12:00 pm	 An aerial perspective of the existing model at 12:00 pm. The shadows are very short and cast almost directly beneath the houses.	 An aerial perspective of the proposed model at 12:00 pm. The shadows are very short and cast almost directly beneath the houses.
2:00 PM	 An aerial perspective of the existing model at 2:00 PM. The shadows are long and cast towards the northeast.	 An aerial perspective of the proposed model at 2:00 PM. The shadows are long and cast towards the northeast, similar to the existing model.
