## 1.0 Introduction

---

This Report describes the Transaction Screen Assessment (TSA) *Paragon Environmental Services, Inc. (Paragon)* performed on the commercial property located at 143 Cedar Street in Somerville, Massachusetts (the Site). *Paragon* conducted this TSA at the request of Mr. Michael Dupuis for *Faulkner Inc. (the Client)*, who authorized this project on March 22, 2006.

The 0.11-acre Site, situated in a commercial and residential area of Somerville, consists of an approximately 3,400-square foot single-story commercial warehouse building. The Site is located on the eastern side of Cedar Street, between its intersections with Albion Street (to the south) and Alpine Street (to the north). The Site address is 143 Cedar Street, Somerville, MA 02143 (see Appendix A, Figure 1). The City of Somerville Assessor's Office records identify the Site as Parcel ID 34/C/65 (see Appendix A, Figure 2).

The front portion of the 3,400-square foot single-story commercial warehouse building has concrete/cinder block construction, flat tar and gravel roof, and a concrete slab-on-grade foundation. The rear portion of the Site building has wood-frame construction and a pitched roof with asphalt shingles. The Site building covers approximately 70% of the Site. The remainder of the Site consists of a paved driveway along the southern side of the Site building. Access to the Site is from the eastern side of Cedar Street. The Site building is currently occupied by Alspar Homes.

The Site building utilizes natural gas for heating. *KeySpan* provides natural gas to the Site. *Nstar* provides electrical service to the Site via aboveground lines. The City of Somerville Water and Sewer Enterprise municipal drinking water system and sanitary sewer system serve the Site. Stormwater runoff generated at the Site either infiltrates the ground surface or enters a catchbasin located along Cedar Street.

City of Somerville Assessor's Office records identify the current Site owner as Alspar Homes, Inc. who purchased the Site from Shirley Primack and Ruth Shneider on June 22, 1976. Municipal records indicate that the Site building was constructed circa 1900. Refer to Section 3.0 for additional historical information pertaining to the Site.

The Site building is currently utilized for light industrial/commercial purposes. *Paragon* did not observe or identify any current tenant activities, which are likely to adversely impact

environmental conditions at the Site. *Paragon* did not observe any visual evidence of underground storage tanks (USTs) or aboveground storage tanks (ASTs) (such as fill or vent pipes) at the Site during our inspection. *Paragon* did not observe the presence of any hazardous substances at the Site during our inspection. According to the database search, Site tenants do not generate hazardous waste at the Site. *Paragon* did not observe any waste pits, landfills, lagoons, or other impoundments at the Site. We did not observe hazardous waste containers or unidentified waste containers of any type at the Site.

Cedar Street abuts the Site to the west, beyond which are multi-family residential properties. *ABC Interior Decorating* and a garage utilized by *Faulkner Brothers Oil Company* for vehicle storage abuts the Site to the north. Residential properties abut the Site to the east and south.

The Site is at an approximate elevation of 10 meters above the National Geodetic Vertical Datum of 1929 according to the United States Geological Survey (USGS) *Boston North, Massachusetts* topographic quadrangle (see Appendix A, Figure 6). The Site topography and land near the Site slightly slopes to the east. Based upon topography and proximity of surface-water bodies (i.e., tributaries, rivers, wetlands), *Paragon* infers groundwater flow to generally be to the east towards the Mystic River. Subsequent references to hydraulic location relative to the Site, specifically in the database sections, are based upon *Paragon's* inferred direction of groundwater flow.

## 1.1 Purpose

A TSA is a preliminary, surficial investigation of the Site designed to identify any *recognized environmental conditions*: evidence of an existing release, past release, or material threat of release of oil and/or hazardous material (OHM) at or in the immediate vicinity of the Site.

## 1.2 Scope of Services/Methodology

In accordance with the guidelines set forth in the American Society for Testing and Materials (ASTM) E 1528-00 *Standard Practices for Environmental Site Assessments: Transaction Screen Process*, as modified by the Client, *Paragon* performed the following activities as part of our investigation:

- Conducted a visual inspection of surface conditions at exterior portions of the Site on April 26, 2006;

- Reviewed records at the City of Somerville Fire Department regarding the presence of underground storage tanks (USTs), aboveground storage tanks (ASTs), hazardous materials storage or releases at the Site or its vicinity, and possible past industrial uses of the Site or any properties in its immediate vicinity;
- Reviewed 1900, 1933, and 1950 *Sanborn Fire Insurance Maps* to ascertain prior Site and vicinity uses and history;
- Contracted a database search of federal and state environmental records from *Environmental Data Resources, Inc. (EDR)* to identify any federal- or state-listed sites within the search radii specified in ASTM E 1528-00;
- Completed a Transaction Screen Questionnaire for the Site (a copy of which is presented as Appendix D) based upon information summarized above; and,
- Visually inspected the Site building for the presence of friable suspect asbestos-containing materials (ACM).

*Paragon* did not conduct laboratory analyses for the presence of asbestos, lead-based paint (LBP), drinking water quality, radon, urea foam formaldehyde insulation, or electromagnetic radiation. Our preliminary inspection for friable suspect ACM and consisted of a visual inspection of readily accessible exterior areas of the Site building. *Paragon* did not intend such an inspection to substitute for a comprehensive survey for the purposes of renovation/demolition of the Site building or to evaluate potential health risks. Although the accepted method of accurately determining subsurface conditions at the Site would be to conduct a *subsurface investigation* (including the collection and analysis of soil and groundwater samples), such investigation was beyond the scope of this TSA. Lastly, this TSA was not intended to substitute for a regulatory compliance audit of the Site.

### 1.3 Findings and Conclusions

Based upon the tasks conducted for this Phase I ESA, *Paragon* identified the following Recognized Environmental Conditions (RECs):

- *Paragon* did not observe any damaged or friable suspect ACM during our Site reconnaissance. Due to the age of the Site building, interested parties should assume that building materials such as floor coverings, roofing materials, flexible fabric ductwork connectors, fire doors, and electrical cable coverings contain asbestos unless laboratory analysis proves otherwise. Friable ACM

poses a potential health risk to Site occupants and workers who breathe ambient air. Non-friable ACM could pose a potential health risk to Site occupants and workers in the event of a renovation or demolition project, which would disturb the asbestos.

- *Paragon* did not observe any flaking, chipping, and/or peeling suspect LBP at the Site. Due to the age of Site building, it is possible that LBP may be present on painted surfaces at the Site. LBP poses a potential health risk to Site occupants, especially to children under the age of six who may ingest paint chips or inhale LBP dust, and workers in the event of an abatement project would disturb the paint.

The following summarizes the releases or threats of release of OHM *Paragon* identified in the immediate vicinity of the Site, and includes our conclusions regarding the impact such releases or threats of release of OHM have had, or may have, on the Site:

- The Somerville Fire Prevention Bureau records indicate that on June 1, 1992, an Edison Company telephone pole broke at the base and fell to the ground resulting in a release of 30-gallons of transformer fluid in the driveway opposite 2 Alpine Street which is located in close proximity to the Site. According to the Fire Prevention records, the release was contained. Based upon its regulatory status, this release does not pose a threat to the Site.
- Somerville Fire Prevention records identify the property at 2 Alpine Street as a registered underground storage tank (UST) facility. This property is located approximately 200 feet northeast of the Site. The records indicate a 2,000-gallon kerosene UST was removed from this property on December 14, 1988. The records indicate two 15,000-gallon heating oil USTs and one 500-gallon heating oil UST are currently located at this property. The database search did not identify this property as a registered UST facility. Additionally, Fire Prevention records indicate that the Fire Prevention Bureau received notice on November 20, 1996 of a possible release of oil from underground storage tanks owned by Faulkner Bros. Oil Co. The records indicate that the location of this release was 7-11 Alpine Street which is adjacent to the northeast of the Site. This record indicates that the release resulted in contaminated soil. The database search identified the 7-11 Alpine Street property as a leaking underground storage tank facility and a state-listed disposal site with Release Tracking Number 3-14447. Based upon the database search, a Class A2 Response Action Outcome statement was submitted to Massachusetts DEP on August 3, 2001. Based on its regulatory status and inferred hydraulically downgradient location, this property does not likely pose a material threat of release of OHM to the Site.

- Somerville Fire Prevention records identify the northwestern adjacent property at 154 Cedar Street as a former UST facility. Records indicate a 1,000-gallon gasoline UST installed in 1950 was removed in 1965; a 20,000-gallon heating oil UST installed in 1941 was removed in 1987; and, a 2,000-gallon (installation date unknown) was also removed in 1987. The database search did not identify this property as a release site. Based on its regulatory status, this property does not likely pose a material threat of release of OHM to the Site.
- In addition to the listings identified above, the database search identified 101 state-listed disposal sites within one mile; 16 leaking underground storage tank (LUST) sites within ½-mile; and 154 Spills since 1993 within one mile of the Site and 27 pre-1993 Spills. Based on their regulatory status, inferred hydraulically cross- or downgradient locations, and/or distances from the Site, the properties identified by the database search do not likely pose a material threat of release of OHM to the Site.

#### 1.4 Recommendations

- Prior to any renovation or demolition activities, which have the potential to disturb known or suspect ACM, *Paragon* recommends conducting a comprehensive ACM inspection. We recommend that any ACM be repaired or abated by a licensed asbestos contractor in accordance with all applicable federal, state, and local regulations. If any ACM remain following these repair and/or abatement activities, we recommend developing and implementing an Operations and Maintenance (O&M) Plan for the Site.

*Cost Estimate (Comprehensive Inspection)..... \$1,800 - \$2,500*

*Cost Estimate (O&M Plan).....\$350*

- Prior to any renovation or demolition activities which have the potential to disturb known or suspect LBP, *Paragon* recommends conducting a comprehensive LBP inspection to determine the extent of flaking, chipping, and/or peeling LBP at the Site. We recommend that LBP be encapsulated or removed by a licensed LBP contractor in accordance with all applicable federal, state, and local regulations. If any LBP remains following these activities, we recommend developing and implementing an O&M Plan for the Site.

*Cost Estimate (Comprehensive Inspection)..... \$1,200 - \$1,500*

*Cost Estimate (O&M Plan).....\$350*

## 2.0 Questionnaire Responses \_\_\_\_\_

Affirmative responses to the attached Transaction Screen Questionnaire indicate areas of potential environmental concern. *Paragon* discusses each affirmative or unknown response for the Site below.

### *Response to Question 4*

Somerville Fire Prevention records identify the property at 2 Alpine Street as a registered UST facility. Please note that 2 Alpine Street is identified as the owner of the USTs and that the USTs are most likely located at 7-11 Alpine Street based upon additional information obtained from the Fire Prevention Bureau and the database search. The records indicate a 2,000-gallon kerosene UST was removed from this property on December 14, 1988. The records indicate two 15,000-gallon heating oil USTs and one 500-gallon heating oil UST are currently located at this property. Additionally, Fire Prevention records indicate that the Fire Prevention Bureau received notice on November 20, 1996 of a possible release of oil from underground storage tanks owned by Faulkner Bros. Oil Co. The records indicate that the location of this release was 7-11 Alpine Street which is adjacent to the northeast of the Site. This record indicates that the release resulted in contaminated soil. The database search identified the 7-11 Alpine Street property as a leaking underground storage tank facility and a state-listed disposal site with RTN 3-14447. According to the database search, a Class A2 Response Action Outcome statement was submitted to DEP on August 3, 2001. Based on its regulatory status and inferred hydraulically downgradient location, this property does not likely pose a material threat of release of OHM to the Site. Please refer to the database summary section below for further information on this adjacent property.

### *Response to Questions 21 (Federal-listed sites) & 22 (State-listed sites)*

*Paragon* contracted database searches of federal and state environmental records. Federal and state sites identified within the search radii are discussed in detail on the following pages. Due to the urban density of the area, *Paragon* reduced some of the search radii as allowed by ASTM. Refer to Appendix C for a complete copy of the database search report. Table 1 summarizes the results of the database search.

**Table 1: Database Search Results**

| <i>Database</i>                                                                                   | <i>Search Radius</i> | <i>Site</i> | <i>Adjacent</i> | <i>0-¼ miles</i> | <i>¼-½ miles</i> | <i>½-1 mile</i> |
|---------------------------------------------------------------------------------------------------|----------------------|-------------|-----------------|------------------|------------------|-----------------|
| NPL                                                                                               | 1 mile               | No          | 0               | 0                | 0                | 0               |

| *Massachusetts does not maintain a listing of LUSTs; therefore, Paragon reviewed Spills to ½-mile |                      |             |                 |                  |                  |                 |

### *National Priority List Sites*

The search did not identify any National Priority List (NPL; i.e., Superfund) sites within one mile of the Site.

### *CERCLIS Listings*

The search did not identify any Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) listings within ½-mile of the Site. A CERCLIS listing is a property under investigation by the state or United States Environmental Protection Agency (EPA) as a potential Superfund site. Additionally, the search did not identify the Site or any abutting/adjoining properties as No Further Remedial Action Planned (NFRAP) CERCLIS listings.

### *RCRA Facilities*

The search did not identify the Site or any adjoining properties as Resource Conservation and Recovery Act (RCRA) hazardous waste generator facilities.

The search did not identify any RCRA Corrective Action (CORRACTS) facilities within one mile of the Site.

The search did not identify any RCRA non-CORRACTS treatment, storage, and disposal (TSD) facilities within ½-mile of the Site.

#### *ERNS Sites*

The search did not identify the Site as an Emergency Response Notification System (ERNS) site.

#### *FINDS Sites*

The search did not identify the Site as a Facility Index System (FINDS) site. A FINDS site is a site that EPA has investigated or has been made aware of in conjunction with various regulatory programs.

#### *State-Listed Disposal Sites*

The search identified 101 state-listed disposal sites within one mile of the Site. Due to the urban density of the area, Table 2 summarizes the three closest state-listed disposal sites within ¼-mile of the Site. Appendix C includes information on the untabulated state-listed disposal sites.

**Table 2: Summary of State-Listed Sites**

| <i>Name/Address</i>                                                                                                     | <i>ID#</i> | <i>Distance/Direction</i> | <i>Description</i> |
|-------------------------------------------------------------------------------------------------------------------------|------------|---------------------------|--------------------|
| 7-11 Alpine Street                                                                                                      | 3-14447    | Adjacent/northeast        | RAO                |
| 35 Lexington Ave                                                                                                        | 3-14276    | 476 feet/northwest        | RAO                |
| 61 Clyde St.                                                                                                            | 3-18771    | 936 feet/northeast        | Tier II            |
| RAO = Response Action Outcome; NFA = No further Action; IRA = Immediate Response Action; RAM = Remedial Action Measure. |            |                           |                    |

The Massachusetts Department of Environmental Protection (DEP) classifies disposal sites as Tier IA, IB, IC, or II based upon a Numerical Ranking System. This system quantifies the environmental threat posed by a particular disposal site

by utilizing factors such as site characteristics, exposure potential, and the types and concentrations of contamination.

Based on their regulatory status, inferred hydraulically cross- or downgradient locations, and/or distances from the Site, the state-listed disposal sites identified by the database search do not likely pose a material threat of release of OHM to the Site.

#### *Registered Underground Storage Tanks (USTs)*

The search did not identify the Site or any adjoining properties as registered UST facilities. Please note that Somerville Fire Prevention Bureau records identified several properties in the vicinity of the Site as registered UST facilities. Please refer to Section 3.2 for further information.

#### *Leaking USTs (LUSTs)*

The DEP does not maintain a separate listing of LUST sites; however, the database search specifically identified those releases having USTs listed as sources. The search did not identify the Site or any adjoining properties as LUST sites. The search identified 16 LUSTs located within ½-mile of the Site. In Massachusetts, the State-listed disposal sites and/or Spill databases include information regarding LUST sites. Table 3 summarizes the three closest LUST sites within ¼-mile of the Site. Appendix C includes information on the untabulated LUST sites.

**Table 3: Summary of LUST Sites**

| <b>Name/Address</b>                                                                                                                                                          | <b>ID#</b> | <b>Distance/Direction</b> | <b>Description</b> |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------|---------------------------|--------------------|
| 7-11 Alpine Street                                                                                                                                                           | 3-14447    | Adjacent/northeast        | RAO-A2             |
| Gasoline Station (former)<br>290 Highland Ave.                                                                                                                               | 3-4124     | 493 feet/ southwest       | Tier 1D            |
| Sportbilt, Inc.<br>227 Cedar St.                                                                                                                                             | 3-11294    | 1,067 feet/northeast      | RAO-A3             |
| RAO-A2 & A3 = Response Action Outcome, a permanent solution has been achieved. Contamination has not been reduced to background, a condition of no significant risk exists.. |            |                           |                    |

Please refer to Section 3.2 below for further information on the adjacent LUST at 7-11 Alpine Street. Based on their regulatory status, inferred hydraulically cross- or downgradient locations, and/or distances from the Site, the LUST sites identified by the database search do not likely pose a material threat of release of OHM to the Site.

#### *Solid Waste Facilities/Landfills*

The search did not identify any solid waste facilities or landfills within ½-mile of the Site.

#### *Spills*

The search did not identify the Site as a Spills listing. The search identified 154 Spills since 1993 and 27 pre-1993 Spills within one mile of the Site. Due to the urban density of the area, Table 4 summarizes the Site and the two closest Spills within ¼-mile of the Site. Appendix C includes information on the untabulated Spills.

**Table 4: Summary of Spills**

| <i>Name/Address</i> | <i>ID#</i> | <i>Distance/Direction</i> | <i>Description</i> |
|---------------------|------------|---------------------------|--------------------|
| 7-11 Alpine Street  | 3-14447    | Adjacent/northeast        | RAO                |
| 35 Lexington Ave.   | 3-14276    | 476 feet/northwest        | RAO                |
| 290 Highland Ave.   | N93-0251   | 493 feet/southwest        | Closed             |

In Massachusetts, the Spills database also includes pre-1993 Spills and post-1993 release sites that the responsible party has not tier classified. Upon tier classification, DEP lists release sites as 'disposal sites.' DEP would likely identify any pre-1990 Spill that significantly impacted the environment as a state-listed disposal site.

Please refer to Section 3.2 below for further information on the adjacent Spills listing at 7-11 Alpine Street. Based on their regulatory status, inferred hydraulically cross- or downgradient locations, and/or distances from the Site, the

remaining Spills identified by the database search do not likely pose a material threat of release of OHM to the Site.

### *Database Search Unmappable Properties*

The search identified unmappable properties in the general vicinity of the Site. Due to inaccurate or missing information provided by the appropriate governmental agency, the database search contractor was unable to definitively plot these sites. *Paragon* reviewed the list of unmappable properties in an attempt to definitively locate these properties. If *Paragon* was able to locate such a property within a respective ASTM search radius, we included it above in the appropriate database sections of this TSA. *Paragon* determined that it is unlikely that the Site is identified on the list of unmappable properties. Refer to Appendix C for information on the unmappable properties.

## 3.0 *Historical Information*

---

### 3.1 *Sanborn Fire Insurance Maps*

*Paragon* reviewed 1900, 1933 and 1950 *Sanborn Fire Insurance Maps* depicting the Site and vicinity at the Boyden Library, Foxborough, Massachusetts. The following summarizes our review of these maps.

*1900* - This map depicts the Site as undeveloped. The map depicts the surrounding properties as developed with residential dwellings (see Appendix A, Figure 3).

*1934* - This map depicts the Site as developed with a single-story automobile storage garage. The vicinity of the Site is primarily developed with residential dwellings (see Appendix A, Figure 4).

*1950* - This map depicts the Site as occupied by a roofing material and lumber storage warehouse. The vicinity of the Site is primarily developed with residential dwellings (see Appendix A, Figure 5).

### 3.2 Fire Department Records

*Paragon* submitted a written request for information pertaining to USTs, ASTs, or the storage or release of OHM at the Site and immediate vicinity to the Somerville Fire Department Fire Prevention Bureau. The Somerville Fire Department Fire Prevention Bureau did not have any information regarding USTs, ASTs, flammable storage permits, or releases of OHM at the Site.

The Somerville Fire Prevention Bureau records indicate that on June 1, 1992, an Edison Company telephone pole broke at the base and fell to the ground resulting in a release of 30-gallons of transformer fluid in the driveway opposite 2 Alpine Street which is located in close proximity to the Site. According to the Fire Prevention records, the release was contained.

Somerville Fire Prevention records identify the property at 2 Alpine Street as a registered UST facility. Please note that 2 Alpine Street is identified as the owner of the USTs and that the USTs are most likely located at 7-11 Alpine Street based upon additional information obtained from the Fire Prevention Bureau and the database search. The records indicate a 2,000-gallon kerosene UST was removed from this property on December 14, 1988. The records indicate two 15,000-gallon heating oil USTs and one 500-gallon heating oil UST are currently located at this property. Additionally, Fire Prevention records indicate that the Fire Prevention Bureau received notice on November 20, 1996 of a possible release of oil from underground storage tanks owned by Faulkner Bros. Oil Co. The records indicate that the location of this release was 7-11 Alpine Street which is adjacent to the northeast of the Site. This record indicates that the release resulted in contaminated soil. The database search identified the 7-11 Alpine Street property as a leaking underground storage tank facility and a state-listed disposal site with RTN 3-14447. According to the database search, a Class A2 Response Action Outcome statement was submitted to DEP on August 3, 2001.

Somerville Fire Prevention records identify the northwestern adjacent property at 154 Cedar Street as a former UST facility. Records indicate a 1,000-gallon gasoline UST installed in 1950 was removed in 1965; a 20,000-gallon heating oil UST installed in 1941 was removed in 1987; and, a 2,000-gallon (installation date unknown) was also removed in 1987. The database search did not identify this property as a release site.

## 4.0 Limitations and Conditions

---

### 4.1 General Limitations and Conditions

The observations in this TSA are valid on the date of the Site reconnaissance and made under the limitations and conditions noted herein. This TSA is also subject to the limitations and conditions contained within the *ASTM Transaction Screens and File Reviews Standard Contract (Standard Agreement)* authorized by the Client on March 22, 2006.

This TSA was prepared for the sole and exclusive use of the Client as specified in the *Standard Agreement*, and it is not intended to be nor shall be relied upon by any other individual or party without the express written authorization of *Paragon*. To the extent that another individual or party acts in reliance, such individual or party shall indemnify and hold *Paragon* harmless for any damages, losses, or expenses arising therefrom. Such reliance shall be at the individual or party's sole risk, without liability on the part of *Paragon*.

### 4.2 Limitations and Conditions of the TSA

The findings discussed herein are based solely and in reliance upon information collected as a result of the activities delineated above in the Scope of Services. *Paragon* neither attests nor renders an opinion as to the accuracy or comprehensiveness of the statements of the individuals interviewed, readily available governmental records, environmental reports conducted by other consultants, analytical results, or the database search results provided by the database contractor.

There is a limit to all environmental investigation in the sense that the researcher must draw conclusions and develop recommendations with information obtained from limited research and Site evaluation. Future assessments and/or subsurface investigations may determine conditions to be different from those implied by surficial observation. *Paragon* does not render any warranty, either express or implied, as to the presence of OHM beyond that observed during the Site reconnaissance. Additionally, further municipal or historical research may identify *recognized environmental conditions* at the Site beyond that identified in this TSA. Any further municipal or historical research, beyond that identified in this TSA, was beyond the scope of our investigation. The passage of time may also results in a change in the environmental characteristics at the Site and

surrounding properties. *Paragon* does not render an opinion as to environmental Site conditions, which change subsequent to the date of the Site reconnaissance. Moreover, the conclusions and recommendations contained herein remain valid for 180 days from the date of this TSA.

As part of our Site reconnaissance, *Paragon* did not attempt to inspect inaccessible areas of the Site including building rooftops, beneath parked motor vehicles, under manholes, in any inaccessible floors of the Site building, or inside electrical transformers. *Paragon* does not render an opinion as to *recognized environmental conditions* at uninspected or visually obstructed portions of the Site.

### 4.3 Methodology

*Paragon* performed professional services and obtained findings in accordance with generally accepted practices of other environmental consultants undertaking similar investigations at the same time in the same geographical area. *Paragon* exercised the degree of care and skill generally exercised by other environmental consultants under similar circumstances and conditions. We followed guidelines set forth in ASTM E 1528-00 *Standard Practices for Environmental Site Assessments: Transaction Screen Process*.

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

## EXECUTIVE SUMMARY

### FEDERAL RECORDS

**RCRAInfo:** RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act ( RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System(RCRIS). The database includes selective information on sites which generate, transport, store , treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month. Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month Large quantity generators generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month. Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/15/2005 has revealed that there are 6 RCRA-SQG sites within approximately 0.25 miles of the target property.

## EXECUTIVE SUMMARY

**UST:** The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Protection's Summary Listing of all the Tanks Registered in the State of Massachusetts.

A review of the UST list, as provided by EDR, and dated 02/10/2006 has revealed that there are 3 UST sites within approximately 0.25 miles of the target property.

**INST CONTROL:** Activity and Use Limitations establish limits and conditions on the future use of contaminated property, and therefore allow cleanups to be tailored to these uses.

A review of the INST CONTROL list, as provided by EDR, and dated 01/10/2006 has revealed that there are 9 INST CONTROL sites within approximately 0.5 miles of the target property.

## EXECUTIVE SUMMARY

**DRYCLEANERS:** A listing of Department of Environmental Protection regulated drycleaning facilities that use perchloroethylene under the Environmental Results Program.

A review of the DRYCLEANERS list, as provided by EDR, and dated 02/15/2006 has revealed that there are 2 DRYCLEANERS sites within approximately 0.25 miles of the target property.

| <u>Lower Elevation</u>       | <u>Address</u> | <u>Dist / Dir</u> | <u>Map ID</u> | <u>Page</u> |
|------------------------------|----------------|-------------------|---------------|-------------|
| CEDAR CLEANER CORPORATION    | 181 CEDAR ST   | 0 - 1/8 NNE       | A2            | 6           |
| ROYAL ENVIRONMENTAL SERVICES | 13 WARWICK ST  | 0 - 1/8 NE        | A4            | 7           |

## EXECUTIVE SUMMARY

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## **FEDERAL RECORDS**

### **NPL: National Priority List**

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

|                                         | Data Release Frequency: Quarterly      |

### **DELISTED NPL: National Priority List Deletions**

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate.

### **NPL RECOVERY: Federal Superfund Liens**

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### **CERCLIS:** Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

|                                         |                                        |
|-----------------------------------------|----------------------------------------|
| Date of Government Version: 10/24/2005  | Source: EPA                            |
| Date Data Arrived at EDR: 12/21/2005    | Telephone: 703-413-0223                |

| Number of Days to Update: 40            | Next Scheduled EDR Contact: 06/19/2006 |
|                                         | Data Release Frequency: Quarterly      |

### **CERCLIS-NFRAP:** CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

|                                         |                                        |

|                                         | Data Release Frequency: Quarterly      |

### **RCRA:** Resource Conservation and Recovery Act Information

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS). The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month. Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month. Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month. Transporters are individuals or entities that move hazardous waste from the generator off-site to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

|                                         |                                        |

|                                         | Data Release Frequency: Varies          |

### **US INST CONTROL:** Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

|                                         |                                         |

|                                         | Data Release Frequency: Varies         |

### **US BROWNFIELDS:** A Listing of Brownfields Sites

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

Data Release Frequency: Annually

### **UMTRA:** Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

| Number of Days to Update: 36            | Next Scheduled EDR Contact: 04/03/2006 |
|                                         | Data Release Frequency: Quarterly      |

### **RAATS:** RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

|                                         |                                           |

## EDR PROPRIETARY RECORDS

### **Manufactured Gas Plants:** EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Data Release Frequency: No Update Planned

## OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

### **CT MANIFEST:** Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 12/31/2003  
Date Data Arrived at EDR: 01/31/2005  
Date Made Active in Reports: 03/30/2005  
Number of Days to Update: 58

Telephone: 860-424-3375  
Last EDR Contact: 03/13/2006  
Next Scheduled EDR Contact: 06/12/2006  
Data Release Frequency: Annually

### **NY MANIFEST:** Facility and Manifest Data

Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a TSD facility.

Date of Government Version: 10/26/2005  
Date Data Arrived at EDR: 11/16/2005  
Date Made Active in Reports: 11/18/2005  
Number of Days to Update: 2

Source: Department of Environmental Conservation  
Telephone: 518-402-8651  
Last EDR Contact: 03/01/2006  
Next Scheduled EDR Contact: 05/29/2006  
Data Release Frequency: Annually

**Oil/Gas Pipelines:** This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

### **Electric Power Transmission Line Data**

Source: PennWell Corporation  
Telephone: (800) 823-6277

This map includes information copyrighted by PennWell Corporation. This information is provided on a best effort basis and PennWell Corporation does not guarantee its accuracy nor warrant its fitness for any particular purpose. Such information has been reprinted with the permission of PennWell.

**Sensitive Receptors:** There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

**AHA Hospitals:**

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

**Medical Centers: Provider of Services Listing**

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

**Nursing Homes**

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

**Public Schools**

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

**Private Schools**

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

**Flood Zone Data:** This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

**NWI:** National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 from the U.S. Fish and Wildlife Service.

RE: 143 Cedar St. Somerville, MA

Dear Ms. Ofgant,

The below information reflects the records of the Somerville Fire Department relative to underground tanks installed or removed within the City of Somerville which we hope will assist you in 21E survey.

You are advised that the Somerville Fire Department is providing this information "to the best of our knowledge" and bears no burden for "infallible records" for which you are passing on this information to your client.

**Re: 21 E File Review**

Attention: Lt. McLaughlin,

*Paragon Environmental Services, Inc.* is conducting an environmental assessment on one property with the following address in Boston:

- 143 Cedar Street, Somerville, MA 02143

I am writing to request any information your department may have regarding hazardous or flammable material storage permits, building department records, take down permits, underground storage tanks, aboveground storage tanks, or hazardous material storage for this address. Thank you in advance for your assistance in this matter. If you have any questions or comments regarding the foregoing, please feel free to contact me at 781.278.0911.

Sincerely,  
*Paragon Environmental Services, Inc.*

  
Lynn Ofgant

Are there currently any industrial <i>drums</i> (typically 55 gal [208 L]) or sacks of chemicals located on the property or at the facility?                                                                                                                                                                                                            | Yes   | No | Unk | Yes                       | No | Unk | Yes                        | No |
| 6b. Did you observe evidence or do you have any prior knowledge that there have been previously any industrial <i>drums</i> (typically 55 gal [208 L]) or sacks of chemicals located on the property or at the facility?                                                                                                                                    | Yes   | No | Unk | Yes                       | No | Unk | Yes                        | No |
| 7a. Did you observe evidence or do you have any prior knowledge that <i>fill dirt</i> has been brought onto the property that originated from a contaminated site?                                                                                                                                                                                          | Yes   | No | Unk | Yes                       | No | Unk | Yes                        | No |
| 7b. Did you observe evidence or do you have any prior knowledge that <i>fill dirt</i> has been brought onto the property that is of an unknown origin?                                                                                                                                                                                                      | Yes   | No | Unk | Yes                       | No | Unk | Yes                        | No |
| 8a. Are there currently any <i>pits, ponds, or lagoons</i> located on the <i>property</i> in connection with waste treatment or waste disposal?                                                                                                                                                                                                             | Yes   | No | Unk | Yes                       | No | Unk | Yes                        | No |
| 8b. Did you observe evidence or do you have any prior knowledge that there have been previously, any <i>pits, ponds, or lagoons</i> located on the <i>property</i> in connection with waste treatment or waste disposal?                                                                                                                                    | Yes   | No | Unk | Yes                       | No | Unk | Yes                        | No |
| 9a. Is there any stained soil on the <i>property</i> ?                                                                                                                                                                                                                                                                                                      | Yes   | No | Unk | Yes                       | No | Unk | Yes                        | No |
| 9b. Did you observe evidence or do you have any prior knowledge that there has been previously, any stained soil on the <i>property</i> ?                                                                                                                                                                                                                   | Yes   | No | Unk | Yes                       | No | Unk | Yes                        | No |
| 10a. Are there currently any registered or unregistered storage tanks (above or underground) located on the <i>property</i> ?                                                                                                                                                                                                                               | Yes   | No | Unk | Yes                       | No | Unk | Yes                        | No |

| Question                                                                                                                                                                                                                                                                                              | Owner |    |     | Occupants (if applicable) |    |     | Observed During Site Visit |    |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------|----|-----|---------------------------|----|-----|----------------------------|----|
|                                                                                                                                                                                                                                                                                                       | Yes   | No | Unk | Yes                       | No | Unk | Yes                        | No |
| 10b. Did you observe evidence or do you have any prior knowledge that there have been previously, any registered or unregistered storage tanks (above or underground) located on the <i>property</i> ?                                                                                                | Yes   | No | Unk | Yes                       | No | Unk | Yes                        | No |
| 11a. Are there currently any vent pipes, fill pipes, or access ways indicating a fill pipe protruding from the ground on the <i>property</i> or adjacent to any structure located on the <i>property</i> ?                                                                                            | Yes   | No | Unk | Yes                       | No | Unk | Yes                        | No |
| 11b. Did you observe evidence or do you have any prior knowledge that there have been previously, any vent pipes, fill pipes, or access ways indicating a fill pipe protruding from the ground on the <i>property</i> or adjacent to any structure located on the <i>property</i> ?                   | Yes   | No | Unk | Yes                       | No | Unk | Yes                        | No |
| 12a. Is there currently evidence of leaks, or spills or staining by substances other than water or foul odors associated with any flooring, drains, walls, ceilings, or exposed grounds on the property?                                                                                              | Yes   | No | Unk | Yes                       | No | Unk | Yes                        | No |
| 12b. Did you observe evidence or do you have any prior knowledge that there have been previously any leaks, spills, or staining by substances other than water, or foul odors, associated with any flooring drains, walls, ceilings or exposed grounds on the property?                               | Yes   | No | Unk | Yes                       | No | Unk | Yes                        | No |
| 13a. If the property is served by a private well or non-public water system, is there evidence or do you have prior knowledge that contaminants have been identified in the well or system that exceed guidelines applicable to the water system?                                                     | Yes   | No | Unk | Yes                       | No | Unk | Yes                        | No |
| 13b. If the property is served by a private well or non-public water system, is there evidence or do you have prior knowledge that the well has been designated as contaminated by any government environmental/health agency?                                                                        | Yes   | No | Unk | Yes                       | No | Unk | Yes                        | No |
| 14. Does the <i>owner</i> or <i>occupant</i> of the <i>property</i> have any knowledge of <i>environmental liens</i> or governmental notification relating to past or recurrent violations of environmental laws with respect to the <i>property</i> or any facility located on the <i>property</i> ? | Yes   | No | Unk | Yes                       | No | Unk |                            |    |
| 15a. Has the owner or occupant of the <i>property</i> been informed of the past existence of hazardous substances or petroleum products with respect to the <i>property</i> or any facility located on the <i>property</i> ?                                                                          | Yes   | No | Unk | Yes                       | No | Unk |                            |    |

| Question                                                                                                                                                                                                                                                                                                                                                              | Owner |    |     | Occupants (if applicable) |    |     | Observed During Site Visit |    |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------|----|-----|---------------------------|----|-----|----------------------------|----|
|                                                                                                                                                                                                                                                                                                                                                                       | Yes   | No | Unk | Yes                       | No | Unk |                            |    |
| 15b. Has the <i>owner</i> or <i>occupant</i> of the <i>property</i> been informed of the current existence of <i>hazardous substances</i> or <i>petroleum products</i> with respect to the <i>property</i> or any facility located on the <i>property</i> ?                                                                                                           |       |    |     |                           |    |     |                            |    |
| 15c. Has the <i>owner</i> or <i>occupant</i> of the <i>property</i> been informed of the past existence of environmental violations with respect to the <i>property</i> or any facility located on the <i>property</i> ?                                                                                                                                              |       |    |     |                           |    |     |                            |    |
| 15d. Has the <i>owner</i> or <i>occupant</i> of the <i>property</i> been informed of the current existence of environmental violations with respect to the <i>property</i> or any facility located on the <i>property</i> ?                                                                                                                                           |       |    |     |                           |    |     |                            |    |
| 16. Does the <i>owner</i> or <i>occupant</i> of the <i>property</i> have any knowledge of any <i>environmental site assessment</i> of the <i>property</i> or facility that indicated the presence of <i>hazardous substances</i> or <i>petroleum products</i> on, or contamination of, the <i>property</i> or recommended further assessment of the <i>property</i> ? |       |    |     |                           |    |     |                            |    |
| 17. Does the <i>owner</i> or <i>occupant</i> of the <i>property</i> know of any past, threatened, or pending lawsuits or administrative proceedings concerning a release or threatened release of any <i>hazardous substance</i> or <i>petroleum products</i> involving the <i>property</i> by any owner or occupant of the <i>property</i> ?                         |       |    |     |                           |    |     |                            |    |
| 18a. Does the <i>property</i> discharge waste water, (not including sanitary waste or stormwater), onto or adjacent to the <i>property</i> , and/or into a stormwater system?                                                                                                                                                                                         |       |    |     |                           |    |     | Yes                        | No |
| 18b. Does the <i>property</i> discharge waste water, (not including sanitary waste or stormwater), onto or adjacent to the <i>property</i> , and/or into a sanitary sewer system?                                                                                                                                                                                     |       |    |     |                           |    |     | Yes                        | No |
| 19. Did you observe evidence or do you have any prior knowledge the any <i>hazardous substance</i> or <i>petroleum products</i> , unidentified waste material, tires, automotive or industrial batteries, or any other waste materials have been dumped above grade, buried and/or burned on the <i>property</i> ?                                                    |       |    |     |                           |    |     | Yes                        | No |
| 20. Is there a transformer, capacitor, or any hydraulic equipment for which there are any records indicating the presence of PCBs?                                                                                                                                                                                                                                    |       |    |     |                           |    |     | Yes                        | No |

**Government Records/Historical Sources Inquiry**  
(See guide, Section 10)

21. Do any of the following Federal government record systems list the property or any property within the search distance noted below:

|                                                                          |     |    |
|--------------------------------------------------------------------------|-----|----|
| Federal NPL site list – within 1.0 mile (1.6 Km)                         | Yes | No |
