Hi Hans

We have reviewed EnviroTrac's correspondence to you dated October 28, 2016. As stated therein, it is the intention of the "owner" to report the exceedances of Reportable Condition (RC) threshold criteria at the subject property to the Massachusetts Department of Environmental Protection (MDEP), and that they will be performing all necessary response actions associated with this filing, pursuant to the provisions of the Massachusetts Contingency Plan (MCP). During this regulatory compliance process, the representativeness of selected data, as identified in our peer review correspondence dated September 28, 2016, will be addressed. Accordingly, we recommend that the City be copied on all documentation submitted to MDEP on this matter. Upon your review, if you should have any questions or need further assistance, please feel free to contact me at your convenience.

Thanks  
Jeff
